

# HER DISABILITY CAN'T STOP HER

*(A success Story of Bhumikarani Munda)*

## Before Intervention

15 years old Bhumika Rani Munda ,daughter of late Mr. Sudarshan Munda & Mrs. Ranjulata Munda belongs to Khuntapada, a tribal village of Keonjhar District. She is Ataxic cerebral palsy child. They are two sisters & Bhumikarani is the younger one. She had delayed birth cry & developmental milestone. There is no

such family History belongs to her disease. When she was 3years Old her father expired. After that incident her family faced many financial problems.

To fulfil the financial requirement of the family , her mother started working as a daily labour. Due to the financial problem of her family, she was neglected & did not get any kind of medical services & treatment.

## During Intervention

One leg stands for balancing,

breezing exercise

Our SADBHABANA awareness camp was held at patana block in the year 2017, the child was identified by the team members of SADBHABANA, keonjhar. She was mother convinced by our centre with her child. Now we are treating her she is treated in Sadbhabana for better health improvement and for a successful and destinable life. When she came to our centre, she was very calm, quite and an introvert in nature but she feels and feeling difficulty in standing & walking. So she used to stand &walk by holding sticks. She also face problem in hearing and learning. But she is very Co-operative and obeys every command of elders. Her educational Qualification was nill. As she is Ataxic cerebral palsy child, some steps & and processes are decided for

her better life & gradual improvement. So physiotherapy, occupational therapy, speech therapy, dance class, drill class, special Education yoga and proper teaching pattern are given to the child at Sadbhababa for her improved future. Our therapist given treatment like Stretching of tight structure , strengthening of

abdominal and pelvic muscle, positioning strengthening Exercise, standing supported by standing frame, proper Gait training for improve gait pattern , balances co-ordination or Electrical Stimulation like faradic Current for power improve . oro motor massage for speech development, Blown the balloon , chew the chewing gum & make bubbles. Our Special Educators given the special education covers five areas like Personal Skills, Social skills, academic skills, occupational or recreational skills and other Co-curricular like dancing, painting etc. After 3years of therapeutic & special educational intervention now the child is able to do the following works.

## After Intervention

Viz: - Now she is able to stand and walk without assistance y with proper guidance.

She is able to kneel; Half kneel Quadripod & sit to stand herself. She is able to walk ,as she has some tightness of TA.Now she is able to do her ADL activities independently Now she is capable of to speak & write her develop name, address, father & mother name.Basic education like – colour concept , number concept , addition, subtraction, flowers, vegetables animals, birds, fruits, days of the week & months name etc..Her

socialization skills in also developed & now she felt herself comfortable to mix with others.Now a days she is able to participate in various dance competition & dance

performance in inside and outside of the district & got prizes & also in drawing competition. She proves

**Bhumika got 2<sup>nd</sup> Position in soft ball through in district level disable sports**

herself in some way that disability is not only a very difficult word to understand or to feel, but also it is a very easy and similar to ability that “DIS is Ability” Life is very vast and every times it teaches us something to

learn from someone, so all those child who are in a back stage of main society, **Sadhababa is always trying to enhance their potentialities and to make them in the main streaming of the society.**
