

**Before Intervention:-**

Lalit Nayak is a differently abled boy of Patua village of Mayurbhanj District. He is an Intellectual Disability boy. He belongs to a socially & economically backward family. His father's name is Narahari Nayak & mother's name is Gandhari Nayak. His father is a daily labour & mother is a housewife. He has 2 sisters. Lalit is the only son of his parents. Both the sisters are elder than Lalit. His 2<sup>nd</sup> elder sister is also an Intellectual Disability girl. His problem was recognized at the age of 5. He couldn't show the age appropriate behaviour. His personal skill (ADL activities), social skill is very poor as per his age (previously he couldn't perform his ADL activities like bathing, combing, wear his shirt & pant etc.) his family members are illiterate, they are unaware of disability. His family members are surrounded by lots of blind beliefs & superstitions & non acceptance etc. They thought that it was a curse. Though his family members & parents are unaware about disability they don't provide any kind of intervention to Lalit. He was neglected by his parents due to lack of information, ignorance, knowledge & acceptance. Lalit was not accepted by her family members. When he was grown up he couldn't perform his ADL activities properly. Day by day his socialization skill was poor & problem behaviour increased.

After getting information about our organization his parents came to our centre with their boy in the year 2017.

**During Intervention:-**

When Lalit came to our centre he don't know how to behave others, how to pay respect to elders, how to behave in public place etc.. He was unable to perform his ADL activities properly. He don't have any basic education. Our special educators taught him to perform his ADL activities with his own. Socialization skill was also taught by our special educators to Lalit. Problem behaviour management activities are also done by our special educators. Sports training also given to him. Educational services like his name, colour concept, birds, animals, vegetables, fruits, identification of money, big & small, long & short etc. are also taught to him by our special educators. Yoga & exercises are also taught to him.

**After Intervention:-**

After 2 and half years of intervention now Lalit is able to do the following activities like how he is able to do his ADL activities like bathing properly, wearing his dress, combing etc.. Now most of his problem behaviours are managed. Lalit is able to participate in different district level sports competitions. Now he is a National Level Floor Hockey player. He was played national floor hockey held at Patiala, Punjab in the year 2018 & got Bronze medal for our state, district & also for our organization & we feel proud for our Lalit's achievement.
