

Before Intervention :-

Manju Maharana a differently abled girl of Sangam village patana block of Kendujhar District. She is a cerebral palsy with locomotor Disability child. She belongs to a socially and economically backward family. Her father is a daily labour. Her mother is a house wife. They are two sisters and one brother, Manju is middle of them. When her mother was 8 months of pregnancy, suffered from Nutritional deficiency, Hypertention. After birth the child was delayed birth cry. And slowly develop as per her age but do not develop her neck control, trunk control, rolling, crawling etc... Her parents taken her for treatment in a medicine man of their village ,but they do not get such good results. Instead of taking medical they go to the village quack and they are fully believed in superstitions , that it is a curse. After her birth manju was not fully accepted by her family members. When she grown up she couldn't perform her ADL activities , she was totally depended on her family. Day by day she and her family faces so many problems due to her condition. Due to financially scarcity they are unable to treat their child for her betterment.

After that her family members are totally psychologically depressed and thought there is no such improvement taken place in their child. Manju is in a miserable condition for a long time.

The awareness camp of SADBHABANA held as sangam village patana block in the year 2017-2018. At that time the child was identified by the team members of SADBHABANA, keonjhar. Her parents convinced by our team members & then came to our centre with their child.

During Intervention :-

When manju came to our centre she was unable to stand,walk, & move from one place to another. She is unable to do her ADL activities properly. She is totally dependent & she has no basic education. Though she is a CP with locomotor disability child. Our physiotherapist diagnose her and given treatment like all joint passive movement, PNF, gripping activities, maintain the positioning, breathing exercise, electrical stimulation like faradic stimulation, pegboard setting etc.. for reduce spasticity or tightness, strengthen the muscle power & muscle strength.

Our special educations gave her educational services like writing her name, parents name, identification of basic colours, vegetables, fruits, flowers, animals, birds, body parts, etc....

After Intervention:-

After 2 years of therapeutic & special educational intervention now Manju is able to do the following works. such as do her ADL activities independently (like... Brushing, Feeding, Dressing, Toileting, Combing etc....). Her socialization skill is also developed. Now she is able to do ball throughing wheelchair race, dancing, drawing, painting etc.. now she is able to write her name independently, know about her body parts, their function counting nos, rhymes etc... she is able to perform different dance & drawing competition in various places inside & outside the district & got prizes.
